Fuji changed the way manual focus works on the X100F but we can convince them to change it back! All previous versions of the X100 series have maintained the focus distance when the camera was powered off or entered sleep mode. This let street photographers (like myself) use the camera as a hyperfocal shooter.

I've recently struck an odd problem with my X100, which has firmware 1.2 (or whatever's the latest one, anyway). I've found that I can't focus to infinity with the manual focus setting. The lens itself is fine to focus to infinity, but if I twist the ring until it indicates infinity, while set to MF, it's out of focus.
